## HERBS

## Quick Planting Guide

Plant 1/8"-1/4" deep in well-drained soil.

Home Grown

|          | Days to<br>Germinate | Thin to<br>"Apart<br>(outside) | Light          | Quick Tip                        |
|----------|----------------------|--------------------------------|----------------|----------------------------------|
| Arugula  | 5-14                 | 1-6"                           | sun/part shade | Harvest when leaves are 2"       |
| Basil    | 5-30                 | 4-6"                           | full sun       | Plant in warm weather only       |
| Borage   | 7-14                 | 12"                            | sun/part shade | Edible blue flowers and leaves   |
| Chives   | 7-21                 | 4-8"                           | sun/part shade | Remove spent blossoms            |
| Cilantro | 7-10                 | 8-10"                          | sun/part shade | Plant every few weeks            |
| Marjoram | 8-14                 | 6-8"                           | full sun       | Sweeter than oregano             |
| Oregano  | 8-14                 | 12"                            | full sun       | Perennial in warm climates       |
| Parsley  | 21-28                | 6-12"                          | sun/part shade | Likes well-drained rich soil     |
| Sage     | 4-21                 | 12"                            | full sun       | Perennial in most zones          |
| Thyme    | 10-28                | 6-12"                          | sun/part shade | Start indoors, barely cover seed |
